Advanced Medical Imaging (RADR 2333) Fall 2018

Credit: 3 semester credit hours (2 lecture and 2 lab)

Pre-requisite: RADR 2401 Intermediate Radiographic Procedures

Course Description - An exploration of specialized imaging modalities.

The course defines and explains the concept of digital radiography. The course describes differences between analog and digital imaging with emphasis on technique considerations with regard to patient dose reduction. The course emphasizes the performance of radiologic exams that reflect those in imaging departments.

The course also describes specialized imaging modalities and includes concepts and theories of equipment operations, positioning and examination considerations, and their integration for medical diagnosis. The course also describes the various specialized imaging modalities and differentiates between images produced by different modalities and identifies the anatomy demonstrated.

Required Textbooks and Materials

- Digital Radiography and PACS, 2nd Ed., Carter and Veale
  - ISBN# 978-0-323-008644-8
- Radiographic Positioning and Related Anatomy, Bontrager, 9th Ed.
- 882 Scantrons

Reference

- Radiography in the Digital Age, Quinn B. Carroll
- Radiologic Science for Technologists, 10th Ed., Bushong
  - ISBN# 978-0-323-08135-1
- Principles of Radiographic Imaging, 3rd Ed., Carlton and Adler
  - ISBN# 0-7668-1300-2

Course Objectives

Describe the various specialized imaging modalities; and differentiate between images produced by different modalities and identify the anatomy demonstrated.

Upon completion of this course, the student will be able to:

1. Differentiate between analog and digital imaging.
2. Identify and discuss the components of computed radiography.
3. Identify and discuss the components of a direct radiography imaging system.
4. Differentiate among the various specialized imaging modalities and associated equipment.
5. Identify and compare anatomy as imaged by different specialty modalities.
Course Outline

**Digital Imaging**
1. Define image brightness.
2. Discuss analog vs. digital imaging.

**Computed Radiography**
1. Identify the components of image plates.
   A. Phosphor layer
   B. Base
   C. Protective layer
2. Describe the read process.
   A. Photostimulable luminescence (PSL)
   B. Laser scanning
   C. Erasure
3. Explain the relative speed of digital systems.

**Direct Radiography**
1. Define digital radiography.
   A. Collection elements
      1. Photodiodes
      2. Charged-coupled devices (CCD’s)
      3. Thin-film transistors
2. Discuss Direct Capture
   A. Advantages
   B. Disadvantages
   C. Flat panel detectors
   D. Pixel Pitch
   E. Fill Factor
   F. Detector Element
3. Discuss Indirect Capture
   A. Advantages
   B. Disadvantages

**Digital Image Characteristics**
1. Explain image matrix
2. Identify and discuss pixels
3. Identify and discuss image sampling
4. Explain histograms
5. Discuss the concept of equalization

**Spatial Resolution**
1. Identify the controlling factors.
   A. Matrix size
   B. Pixel size

**Contrast Resolution**
1. Discuss dynamic range
   A. Bit depth
   B. Pixels
Windowing
1. Explain window level
2. Explain window width

Technique Selection
1. Define ALARA and relate to digital imaging
2. Discuss Kvp selection specific to digital imaging
3. Discuss Mas selection specific to digital imaging
4. Define dose creep
5. Define exposure creep

Exposure Index
1. Describe exposure index for computed radiography and direct radiography
2. Define underexposure and discuss corrections
3. Define overexposure and discuss corrections
4. Define normalization
5. Explain the concept of signal to noise ratio
6. Define dose area product

Viewing Monitors
1. Describe cathode ray tubes (CRT)
2. Describe active matrix liquid crystal display (AMLCD)
3. Describe plasma monitors
4. Discuss the photometric properties
5. Define lumen
6. Define luminance

Pre-processing Modes for the Digital Image
1. Explain flat fielding
2. Describe offset images
3. Describe gain images
4. Explain signal interpolation
5. Explain image lag
6. Describe look up tables (LUT)
7. Explain line noise

Post Processing Options for the Digital Image
1. Explain image annotation
2. Explain image magnification
3. Explain image flip/image inversion
4. Explain digital subtraction (DSA)
5. Explain background shuttering
6. Explain pixel shift
7. Describe and explain the region of interest (ROI)
8. Describe image orientation
9. Describe image stitching
10. Describe edge enhancement

PACS
1. Define the components of image storage.
2. Define picture archiving and communication system (PACS)
3. Explain the system components and functions
4. Define the emergency contingency plan
5. Define film digitizers
6. List and define network configurations
7. Define teleradiology

Quality Control and Quality Management
1. Describe quality management in digital imaging.
2. Equipment calibration
3. Plate reader QM
4. Image monitor
   A. SMPTE
   B. AAPM TG18
6. Define the standards in image monitor evaluation.
7. Define and describe digital image artifacts.
   A. Image receptor
   B. Pixel malfunction
   C. Ghost images
   D. Moire effect/aliasing
   E. Backscatter
   F. Rough handling
   G. Software
   H. Dead pixels
   I. Flatfielding
   J. Image compression
      1. Lossless
      2. Lossy
   K. Patient Considerations
   L. Collimation
   M. Fading
   N. Heat
   O. Banding
   P. Overexposure

Introduction to Pharmacology
1. Define common terms used in pharmacology.
2. List the routes of administration of pharmacologic agents.
3. Identify the general guidelines for drug administration.
4. Identify the principles of intravenous (IV) therapy including complications and equipment.
5. Define the principle of venipuncture.
6. Define local anesthesia.
7. Define conscious sedation.
8. Identify the various types of pharmacologic agents used in conjunction with the advanced radiographic and interventional procedures.
9. List the medications used in cases of cardiac or respiratory emergencies.
10. List the principles of medication dose calculation.
11. Define the medication reconciliation form and its purpose.
Contrast Media
1. Identify the necessity for the use of contrast agents.
2. Describe the classes of contrast agents.
   A. Positive media
   B. Negative media
3. Describe the evolution of the organic iodine contrast media.
   A. Ionic
   B. Non-ionic
4. Define the characteristics of a contrast agent.
   A. Osmolality
   B. Toxicity
   C. Viscosity
   D. Miscibility
   E. Persistence
5. Describe the excretory pathways of the various contrast agents.
   A. Urinary
   B. Gastrointestinal
6. Define informed consent as it applies to contrast media studies.
   A. Verbal consent
   B. Written consent
7. List and describe the general precautions that should be applied to contrast media studies.
   A. BUN
   B. Creatinine
   C. Allergies
8. Identify the reactions and complications resulting from the use of contrast agents.
   A. Overdose
   B. Anaphylactic
   C. Cardiovascular
   D. Psychogenic

Nonvascular Interventional Procedures
1. Describe the procedure and indications for vertebroplasty.
2. Describe the procedure and indications for kyphoplasty.
3. Describe the procedure and indications for percutaneous abscess drainage.
4. Describe the procedure and indications for needle aspiration.
5. Describe the procedure and indications for catheter drainage.
6. Describe the procedure and indications for percutaneous needle biopsy.
7. Describe the procedure and indications and imaging for epidural spinal injections.

Arthrography
1. Identify the various types of joints and their movement.
2. List the indications and contraindications for the procedure.
3. Identify the type of contrast medium used for the procedure.
4. Describe the patient preparation for the procedure.
5. List the specialized equipment necessary for the procedure.
6. Describe the patient positioning for the procedure.
7. Explain the other modalities used to evaluate the joints and muscles.

Female Reproductive System
1. Identify the anatomy of the female reproductive system.
2. List the indications and contraindications for the hystersalpingograms.
3. Identify the type of contrast media used for hystersalpingograms.
4. Describe the patient preparation for hystersalpingograms.
5. List the specialized equipment necessary for hystersalpingograms.
6. Describe the patient positioning for hystersalpingograms.
7. Explain the other modalities used to evaluate the female reproductive system.
   A. Pelvimetry
   B. Fetograms
8. Explain the special considerations for imaging pregnant females.

Gastrointestinal Procedures
1. Identify the anatomy and pathophysiology of the gastrointestinal system.
2. Identify the anatomy and pathophysiology of the biliary system.
3. Explain the procedures for special exams of the gastrointestinal and biliary systems.
   A. Endoscopic retrograde cholangiopancreatography (ERCP)
   B. Modified barium swallow or video esophogram
4. Describe common pathologies of the gastrointestinal system.
5. Describe sialograms.
6. Identify the anatomy of the salivary glands.
   A. List the indications and contraindications for the procedure.
   B. Identify the type of contrast media used for the procedure.
   C. Describe the patient preparation for the procedure.
   D. List the specialized equipment necessary for the procedure.
   E. Describe the patient positioning for the procedure.

Additional Topics
1. Describe and explain various types of venous access devices.
   A. Correct placement
   B. Incorrect placement
   C. Peripherally inserted catheters.
   D. Dialysis catheters
   E. Implanted ports
2. Describe and explain endotracheal tubes.
   A. Correct placement
   B. Incorrect placement
   C. Ventilator patients
3. Describe chest tubes and associated pathologies.
4. Describe cardiac pacemakers and radiologic evaluation of their placement.
5. Describe various nasogastric tubes and radiologic evaluation of their placement.
6. Describe nasoenteric tubes and radiologic evaluation of their placement.
7. Explain various types of tissue drains.
Grade Scale
93-100 ......................... A
92-84 ......................... B
83-77 ......................... C
65 -76 ......................... D
64 & below ..................... F

Course Evaluation
Grades will be determined from four (4) tests, lab attendance and assignments, quizzes, and a comprehensive final.

4 tests = 15% each
Lab assignments & quizzes= 15%
Final Exam= 25%

Course Requirements
1. There will be four major tests and a comprehensive final exam.
2. Homework, quizzes, and lab assignments will be averaged together for 15% of the grade.
3. Lab material will be tested during the lecture component. There will be assignments that will have to be completed and signed off on by an instructor for the student to pass the course. These will be graded on a pass/fail basis. There will be assignments that will be graded and these will be part of the lab & quizzes grade. The assignments will need to be completed before the final exam. Students not completing the assignments for lab will be given an incomplete in the course and will not progress in the radiology program.

Course Policies
- **Attendance Policy:** Students missing over 3 class days will be dropped from the course and will not be permitted to continue in the program.
- Students who are 10 minutes or more late to lab will be counted absent and will be required to make up the lab assignment at a later time.
- Four tardies in class/lab will be counted as an absence.
- Cell-phones, headphones and any other noisemakers must be turned off while in class. If one of these devices goes off during class you will be asked to leave the classroom. Do not bring children or pets to class. If you enter the classroom late, do not walk in front of the instructor or projector.
- Smart watches may not be worn during quizzes or tests.
- Lap top computers, I-pad…may be used to take notes during class but may not be used to “surf” the internet, look-up answers, nor anything else not directly related to note taking.
- **Missed Examinations:** Any student missing an examination will be allowed to make up the test with a 10 point reduction on their grade for that test.
- **Homework Policy:** Late homework will be accepted but will result in a reduction of 10 points for each class day it is late.
Technical Requirements
The latest technical requirements, including hardware, compatible browsers, operating systems, software, Java, etc. can be found online at:
https://help.blackboard.com/en-us/Learn/9.1_2014_04/Student/015_Browser_Support/015_Browser_Support_Policy A functional broadband internet connection, such as DSL, cable, or WiFi is necessary to maximize the use of the online technology and resources.

Disabilities Statement
The Americans with Disabilities Act of 1992 and Section 504 of the Rehabilitation Act of 1973 are federal anti-discrimination statutes that provide comprehensive civil rights for persons with disabilities. Among other things, these statutes require that all students with documented disabilities be guaranteed a learning environment that provides for reasonable accommodations for their disabilities. If you believe you have a disability requiring an accommodation, please contact the Special Populations Coordinator at (409) 880-1737 or visit the office in Student Services, Cecil Beeson Building. You may also visit the online resource at http://www.lit.edu/depts/stuserv/special/defaults.aspx

Student Code of Conduct Statement
It is the responsibility of all registered Lamar Institute of Technology students to access, read, understand and abide by all published policies, regulations, and procedures listed in the LIT Catalog and Student Handbook. The LIT Catalog and Student Handbook may be accessed at www.lit.edu or obtained in print upon request at the Student Services Office. Please note that the online version of the LIT Catalog and Student Handbook supersedes all other versions of the same document.

Starfish
LIT utilizes an early alert system called Starfish. Throughout the semester, you may receive emails from Starfish regarding your course grades, attendance, or academic performance. Faculty members record student attendance, raise flags and kudos to express concern or give praise, and you can make an appointment with faculty and staff all through the Starfish home page. You can also login to Blackboard or MyLIT and click on the Starfish link to view academic alerts and detailed information. It is the responsibility of the student to pay attention to these emails and information in Starfish and consider taking the recommended actions. Starfish is used to help you be a successful student at LIT.
