Cardiopulmonary Testing (RSPT 1335)

Credit: 3 semester credit hours (3 hours lecture, 1 hours lab)

Prerequisite: RSPT 1329, RSPT 1207, RSPT 2210, RSPT 1113, RSPT 1325

Co-requisite: RSPT 1331, RSPT 1360

Course Description
A study of pulmonary functions and cardiac dysrhythmias interpretation

Required Textbook and Materials
2. Respiratory Care Principles and Practice (ISBN # 978-1-284-050000-4)
5. PFT Notes- Gary White (ISBN#978-0-8036-2249-4)
6. DataArc assess
7. #2 Pencils
8. Package of # 882 scantrons
9. Calculator
10. Ruler
11. Web based reading information: www.AARC.org
Clinical practice guidelines:
Body Plethysmography 2001 – revision and update
Capnography/ Capnometry during mechanical ventilation 2003 revision and update
Exercise for evaluation of hypoxemia and desaturation 2001 revision and update
Methacholine Challenge Testing 2001 revision and update
Spirometry 1996 revision and update
Single breath carbon monoxide diffusion capacity 1999 revision and update
Pulmonary function testing- ATS/ERS standardization
ATS statement guidelines for the Six minute walk test

Course Objectives
Upon completion of the course the student will be able to:
1. Explain/identify both normal and abnormal heart conduction.
2. Explain/ identify both normal and abnormal pulmonary function values.
3. Determine indications, describe methods, standards and purpose of monitoring cardiac function and pulmonary function within patient scenarios.
4. Interpret both cardiac rhythm strips and pulmonary function studies.

Revised 01/17
5. Determine appropriate response to different patient scenarios involving pulmonary functions studies and cardiac monitoring.

**Course Outline**

A. Electrical conduction/Electrophysiology
   1. The generation of the electrical current in the heart
   2. Electrical current through the four chambers of the heart
   3. Detecting and recording the EKG waves
   4. Time and voltage

B. Hypertrophy and Enlargement
   1. Atrial enlargement/hypertrophy
   2. Ventricular enlargement/hypertrophy

C. Conduction Blocks
   1. What is a conduction block
   2. Life-threatening blocks
   3. AV blocks- first degree, second degree (mobitz I and mobitz II ), third degree
   4. Bundle Branch Blocks
   5. EKG pacemaker spikes

D. Disorders associated with abnormal EKG’s
   1. MI
   2. Electrolyte imbalances
   3. Drug toxicity

E. Cardiac procedures
   1. Angioplasty
   2. IABP
   3. LVAD
   4. RVAD

F. Lung volumes
   1. Equipment
   2. Procedure
   3. Techniques used to determine.

G. Spirometry and Pulmonary Mechanics
   1. Equipment
   2. Procedure

H. Gas Distribution Test
   1. Single-breath nitrogen elimination
   2. Phases of the single breath nitrogen elimination
   3. Procedure

I. Diffusion
   1. Gases used
   2. Procedure
   3. Equipment

J. Methacholine and Histamine Bronchial Provocations Testing
   1. Indicators
   2. Inhaled substances
   3. Positive findings

K. Capnography
   1. Indications
   2. Requirements for CO2 removal
   3. Situations hindering Co2 removal
   4. Graphic analysis
   5. Assessing patient response to procedures based off the end-tidal Co2 results
   6. Calculating Vd/VT

L. Indirect Calorimetry
   1. Indications
   2. Contraindications
   3. Hazards and Complications
   4. Assessment of Need
   5. Assessment of Test Quality
   6. Monitoring during indirect calorimetry
M. Stress testing
   1. Indications
   2. Contraindications
   3. Hazards
   4. Monitoring
   5. Positive responses

Grade Scale
93 – 100     A
85 – 92      B
77 – 84      C
68 – 76      D
0 – 67       F

Course Evaluation
Final grades will be calculated according to the following criteria:
4 – 6 EXAMS = 95%
Daily pop quizzes will be given at the start of class. If you are late for class this pop quiz will not be made up. The average of the daily pop quiz grades will count as 1 exam. You may drop 2 daily pop quiz grades prior to average.
Lab- 5%

Course Requirements
1. Competency in performing bedside mechanics/ spirometry on peers within the laboratory setting.
2. Competency in connecting leads for a 12 lead EKG on a mannequin in the laboratory setting.

Course Policies
1. No food or drink, or use of tobacco products in class
2. Beepers, telephones, headphones, and other electronic devices must be turned off while in class
3. On days of test, you will place personal items at the front of the classroom. No electronic devices may be used during an exam. If you have a electronic device during an exam you will receive a 0 for that exam.
4. No children allowed in the classroom
5. No late assignments will be accepted
6. Pop Quiz will not be able to be made up.
7. Comply with LIT policies and policies in the Respiratory Care Handbook
8. Comply with course and/or instructor policies, distributed on the first class day
9. Labs are graded on attendance and participation. If you miss one lab your lab grade will be 90. If you miss 2 labs your lab grade will be 80, If you miss 3 labs your lab grade will be 70, If you miss 4 labs your lab grade will be 60. Early departure or tardiness will result in an absence. Failure to obtain competency in the required procedures will result in an “F” for the course.
Technical Requirements (for courses using Blackboard)
The latest technical requirements, including hardware, compatible browsers, operating systems, software, Java, etc. can be found online at:
A functional broadband internet connection, such as DSL, cable, or WiFi is necessary to maximize the use of the online technology and resources.

Disabilities Statement
The Americans with Disabilities Act of 1992 and Section 504 of the Rehabilitation Act of 1973 are federal anti-discrimination statutes that provide comprehensive civil rights for persons with disabilities. Among other things, these statutes require that all students with documented disabilities be guaranteed a learning environment that provides for reasonable accommodations for their disabilities. If you believe you have a disability requiring an accommodation, please contact the Special Populations Coordinator at (409) 880-1737 or visit the office in Student Services, Cecil Beeson Building. You may also visit the online resource at http://www.lit.edu/depts/stuserv/special/defaults.aspx

Student Code of Conduct Statement
It is the responsibility of all registered Lamar Institute of Technology students to access, read, understand and abide by all published policies, regulations, and procedures listed in the LIT Catalog and Student Handbook. The LIT Catalog and Student Handbook may be accessed at www.lit.edu or obtained in print upon request at the Student Services Office. Please note that the online version of the LIT Catalog and Student Handbook supersedes all other versions of the same document
