Class schedule may change during the semester.
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

PREREQUISITE/CO-REQUISITE COURSES
Admittance to the dental hygiene program.

COURSE DESCRIPTION
A study of histology and embryology of oral tissues, gross anatomy of the head and neck, tooth morphology, and individual tooth identification.

COURSE GOALS
1. Locate the major structures of the head and neck.
2. Describe in detail the development of facial structures.
3. Describe all aspects of early tooth development including: stages of development, components of the tooth germ, dentin and enamel formation and mineralization, root development, and cementum formation.
4. Describe enamel: composition, thickness, importance, CEJ relationships, density, color, and solubility.
5. Describe the physical and chemical properties of dentin including its unique structural components and patterns.
6. Describe the functions, components, formation and properties of cementum.
7. Describe the functions, components, and properties of the pulp and apical foramen.
8. Describe the functions of the periodontal ligament, the seven principal fibers, and identify the blood, lymph and nerve supply to the periodontal ligament.
9. Describe the functions and components of the alveolar process.
10. Locate each salivary gland, describe the type of secretion and determine whether major or minor gland.
11. Describe masticatory mucosa in terms of function, texture, and color.
12. State the function of the epithelial attachment.
13. Describe lining mucosa and identify areas covered by lining mucosa.
14. Describe specialized mucosa and identify areas covered by or comprised of specialized mucosa.
15. Describe the arterial and venous blood flow through the head and neck.
16. Identify and state the functions of the muscles of the head and neck.
17. Identify the nerves that supply the head and neck region.
18. Demonstrate knowledge of dental nomenclature.
19. Compare and differentiate in form, function, and position all deciduous and permanent teeth in the human dentition.
20. Determine occlusion classification and deviations from normal in the deciduous and permanent dentitions according to the Angle’s classification of occlusion.
21. Describe the temporomandibular joint and its movements.
22. Identify the histological and embryological development of the orofacial structures.
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

CREDIT HOURS
3 credit hours

CLASS MEETING TIME:
Lecture: Monday thru Thursday 9:00 – 10:30 am  MPC 112
Laboratory: Monday/Wednesday or Tuesday/Thursday 11:00 – 1:55 pm  MPC 127

INSTRUCTOR:
Lecture and Laboratory
Kristina Marie N. Mendoza, RDH, DMD
Office 211 Multi-Purpose Center
Phone 409-839-2914
Office hours: M, T, W, TR 8:00 am – 9:00am
Laboratory
Christine M. Clowe, RDH, BS
Phone 409-880-8860

COURSE POLICIES
1. Attendance Policy
   Students should plan on attending classes, labs and clinic sessions as assigned throughout the semester. Family outings, vacations and personal business should be scheduled when school is not in session and will not be considered excuses for missing assignments, examinations, classes, labs or clinic time.

   Absenteeism
   • In order to ensure the students in the dental hygiene program achieve the necessary didactic and clinical competencies outlined in the curriculum, it is necessary that the student complete all assigned lecture classes, clinical and laboratory hours.
   • If you are unable to attend lecture class, clinic or lab, it is mandatory that you call the appropriate instructor prior to the scheduled class, clinic or lab time. The student is responsible for all material missed at the time of absence. Extenuating circumstances will be taken into account. Extenuating circumstances might include: funeral of immediate family member, maternity, hospitalization, etc.
   • It is expected that students will appear to take their exams at the regularly scheduled examination time. Make-up examinations will be given only if the absence is due to illness (confirmed by a physician's excuse), a death in the immediate family, or at the discretion of the instructor.

   Fall/Spring Semesters:
   Dental hygiene students will be allowed two absences in any lecture, clinic or lab. Absences must be accompanied by a written excuse on the next class day. In the event that a student misses class, clinic or lab beyond the allowed absences, the following policy will be enforced:
   2 absences = verbal warning
   Beginning with 3 absences, 2 points will be deducted from the final course grade for each absence thereafter.

   Summer or 8 week Sessions:
   Dental hygiene students will be allowed one absence in any lecture, clinic or lab. Absences must be accompanied by a written excuse on the next class day. In the event that a student misses class, clinic or lab beyond the allowed absences, the following policy will be enforced:
   1 absence = verbal warning
   2 absences = written warning with the Disciplinary Action Form (DAF)
   3 absences = grade will be lowered one full letter grade
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

2. Tardiness
   • Tardiness is disruptive to the instructor and the students in the classroom. It is expected that students will arrive on time for class, clinic or lab, and remain until dismissed by the instructor. If tardiness becomes an issue, the following policy will be enforced:
     Tardy 1 time = verbal warning
     Tardy 2 times is considered an absence.

3. Starfish
   LIT utilizes an early alert system called Starfish. Throughout the semester, you may receive emails from Starfish regarding your course grades, attendance, or academic performance. Faculty members record student attendance, raise flags and kudos to express concern or give praise, and you can make an appointment with faculty and staff all through the Starfish home page. You can also login to Blackboard or MyLIT and click on the Starfish link to view academic alerts and detailed information. It is the responsibility of the student to pay attention to these emails and information in Starfish and consider taking the recommended actions. Starfish is used to help you be a successful student at LIT.

4. Electronic Devices
   Electronic devices are a part of many individual’s lives today. Devices such as tape recorders, radios, cell phones, paging devices and laptop computers, however, may be disturbing to faculty and classmates. Students, therefore, must receive the instructor's permission to operate all electronic devices in the classroom and clinic. Texting on cell phones or computers will not be allowed during class or clinic.

5. Academic Integrity
   It shall be considered a breach of academic integrity (cheating) to use or possess on your body any of the following devices during any examination unless it is required for that examination and approved by the instructor: Cell phone, smart watch/watch phone, laptop, tablet, electronic communication devices (including optical), and earphones connected to or used as electronic communication devices.
   Use of such devices during an examination will be considered academic dishonesty. The examination will be considered over and the student will receive a zero for the exam.
   Students with special needs and/or medical emergencies or situations should communicate with their instructor regarding individual exceptions/provisions. It is the student’s responsibility to communicate such needs to the instructor.

6. Late coursework. Assignments must be completed by the due date. Late assignments will not be accepted and will result in a zero for that assignment.

7. Remediation. Remediation is available by appointment with the instructor.
   Please advise the instructor if you feel you need remediation and every effort will be made to accommodate you.
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

Americans with Disabilities Act (ADA)
The Americans with Disabilities Act of 1992 and Section 504 of the Rehabilitation Act of 1973 are federal anti-discrimination statutes that provide comprehensive civil rights for persons with disabilities. Among other things this statute requires that all students with documented disabilities be guaranteed a learning environment that provides for reasonable accommodations of their disabilities. If you believe you have a disability requiring an accommodation, please contact Special Populations Coordinator at 409-880-1737 or visit the office located in the Cecil Beeson Building, room 116B. You may also visit the online resource at http://lit.edu/depts/stuserv/special/default.aspx.

Technical Requirements (for Blackboard)
The latest technical requirements, including hardware, compatible browsers, operating systems, software, Java, etc. can be found online at: https://help.blackboard.com/en-us/Learn/9.1_2014_04/Student/015_Browser_Support/015_Browser_Support_Policy. A functional broadband internet connection, such as DSL, cable, or WiFi is necessary to maximize the use of the online technology and resources.

Student Code of Conduct Statement
It is the responsibility of all registered Lamar Institute of Technology students to access, read, understand and abide by all published policies, regulations, and procedures listed in the LIT Catalog and Student Handbook. The LIT Catalog and Student Handbook may be accessed at www.lit.edu or obtained in print upon request at the Student Services Office. Please note that the online version of the LIT Catalog and Student Handbook supersedes all other versions of the same document.

*Faculty has the authority to modify the above policies if appropriate.

TEACHING METHODS
Teaching methods will include
- Lecture
- Discussion
- Laboratory
- CD-ROMs
- Reading Assignments

REQUIRED TEXT

Orofacial Anatomy, Histology and Embryology (DHYG 1301)  
Summer II

**COURSE REQUIREMENTS**
- **Head and Neck Anatomy for Health Professionals CD**: Three Multiple Choice Quizzes must be done using the CD that will be distributed in class. Due dates for each quiz are listed in the class schedule.
- **Two Landmark Identification Quizzes**: These must be done. These will be distributed in class and due dates are written in the class schedule.
- **Tooth and Occlusion Modules**: A series of tooth and occlusion modules corresponding to the individual labs must be completed by the end of this course. No grade will be given for these modules. Students may complete during the lab session or on their own time. Failure to complete all modules will result in an incomplete in this course. **MODULE CHECK-OFF SHEET** will be distributed in class. See course schedule for completion date

- Examination

Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

CONTENT OUTLINE

TOPIC
1. Introduction to Head and Neck Anatomy
   a. Clinical Application
   b. Anatomic Nomenclature
   c. Anatomic Variation
2. Surface anatomy
   a. Surface Anatomy
   b. Regions of the head
   c. Regions of the neck
3. Skeletal System
   a. Skeletal System Overview
   b. Head and neck bones
4. Glandular tissue
   a. Glandular tissue Overview
5. Lymphatic System
   a. Lymphatic system
   b. Lymph nodes of the head
      (1) Occipital Lymph Nodes
      (2) Posterior Auricular, Anterior Auricular, and Superficial Parotid Lymph Nodes
      (3) Facial Lymph Nodes
      (4) Cervical lymph nodes
6. Fascia and Spaces
   a. Fascia and Spaces Overview
7. Spread of Dental Infections
   a. Infection Process Overview
   b. Odontogenic Infection
   c. Spread of Odontogenic Infection
   d. Prevention of Spread of Infection
8. Muscular System
   a. Muscular System Overview
   b. Head and Neck Muscles
      (1) Cervical muscles
      (2) Muscles of facial expression
      (3) Muscles of mastication
      (4) Hyoid muscles
      (5) Muscles of the tongue
      (6) Muscles of the pharynx
9. Vascular System
   a. Vascular System Overview
   b. Arterial Blood Supply to Head and Neck
      (1) Origins to the head and neck
      (2) Internal carotid artery
      (3) External carotid
   c. Venous Drainage of Head and Neck
      (1) Facial vein
      (2) Retromandibular vein
      (3) Venous sinuses
      (4) Internal jugular vein
      (5) External jugular vein
      (6) Pathways to the heart from the head and neck
10. Nervous System
   a. Nervous System Overview
      (1) Central nervous system
      (2) Peripheral nervous system
      (3) Cranial nerves
   b. Nerves to the oral cavity and associated structures
      (1) Trigeminal nerve
      (2) Facial nerve
   c. Nerve lesions of the head and neck

11. Face and Neck Development
   a. Development of the face
      (1) Stomodeum and oral cavity formation
      (2) Mandibular arch and lower face formation
      (3) Frontonasal process and upper face formation
      (4) Maxillary process and midface formation
   b. Development of the neck
      (1) Primitive pharynx formation
      (2) Branchial apparatus formation

12. Orofacial Development
   a. Orofacial development
   b. Palatal development
      (1) Primary palate formation
      (2) Secondary palate formation
      (3) Palate Completion
   c. Nasal cavity and septum development
   d. Tongue development
      (1) Body of the tongue formation
      (2) Base of the tongue formation
      (3) Completion of tongue formation

13. Tooth Development and Eruption
   a. Tooth development
      (1) Initiation stage
      (2) Bud stage
      (3) Cap stage
      (4) Bell stage
      (5) Apposition and maturation stages
   b. Root development
      (1) Root dentin formation
      (2) Cementum and pulp formation
      (3) Multirooted tooth development
   c. Periodontal ligament and alveolar process development
   d. Primary tooth eruption and shedding
   d. Permanent tooth eruption

14. Dental Anatomy
   a. Overview of Dentition
      (1) Dentition
      (2) Dentition Periods
      (3) Dental Anatomy Terminology
      (4) Tooth form
      (5) Considerations for dental anatomy study
   b. Permanent Anterior Teeth
      (1) Permanent Anterior Teeth Properties
         (2) Permanent Incisors
         (3) Canines
   c. Permanent Posterior teeth
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

(1) Permanent posterior teeth properties
(2) Permanent premolars
(3) Permanent molars
d. Primary Teeth
   (1) Primary teeth properties
      (a) Primary incisors
      (b) Primary canines
      (c) Primary molars

15. Temporomandibular Joint
    (1) Temporomandibular joint properties
    (2) Joint bones
       (a) Temporal bone
       (b) Mandible
    (3) Joint capsule
    (4) Joint disc
    (5) Joint movement

16. Occlusion
    a. Occlusion properties
    b. Centric occlusion
       (1) Arch form
       (2) Dental curvatures and angulations
       (3) Centric stops
       (4) Centric relation
       (5) Lateral and protrusive occlusion
       (6) Mandibular rest position
    c. Primary Occlusion
    d. Malocclusion
       (1) Malocclusion classification

15. Dental Histology
    a. Cells
       (1) Cell Properties
       (2) Cell Division
       (3) Extracellular Materials
       (4) Intercellular junctions
    b. Basic Tissue
       (1) Basic Tissue properties
       (2) Epithelium Properties
       (3) Basement Membrane properties
       (4) Connective Tissue properties
       (5) Muscle Properties
       (6) Nerve Tissue properties
    c. Oral Mucosa
       (1) Oral Mucosa Properties
          (i) Lining mucosa
          (ii) Masticatory mucosa
          (iii) Specialized mucosa
          (iv) Epithelium of oral mucosa
          (v) Lamina propria of oral mucosa
    d. Oral mucosa regional differences
       (1) Labial mucosa and buccal mucosa
       (2) Alveolar mucosa
       (3) Floor of the mouth and ventral tongue surface
       (4) Soft palate
       (5) Attached gingival
       (6) Hard palate
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

e. Tongue and lingual papillae properties
f. Oral mucosa turnover, repair, and aging

16. Gingival and Dentogingival Junctional Tissues
   a. Gingival tissues properties
   b. Dentogingival junctional tissues properties

17. Enamel
   a. Enamel properties
   b. Enamel matrix formation
   c. Enamel matrix maturation
   d. Enamel histology

18. Dentin and pulp
   a. Dentin-pulp complex
   b. Dentin properties
      (1) Dentin matrix formation
      (2) Dentin matrix maturation
      (3) Mature dentin components
      (4) Dentin types
      (5) Dentin histology
      (6) Aging dentin
   c. Pulp properties
      (1) Pulp anatomy
      (2) Pulp histology
      (3) Pulp zones
      (4) Aging pulp

19. Periodontium: Cementum, Alveolar Bone, Periodontal Ligament
   a. Components of the periodontium
      (1) Cementum
         (i) Development of cementum
         (ii) Microscopic appearance of cementum
         (iii) Types of cementum
      (2) Alveolar bone
         (i) Anatomy of the jaw bones
         (ii) Development of the jaw bones
      (3) Periodontal ligament
         (i) Components of the periodontal ligament
         (ii) Fiber groups of the periodontal ligament

15. Temporomandibular Joint - Self-Instructional CD-ROM
   a. Overview of the Temporomandibular Joint
      (1) Bones of the joint
      (2) Joint capsule
      (3) Disc of the joint
      (4) Ligaments associated with the joint
   b. Jaw movements with muscle relationships
   c. Palpation of the joint
LEARNER OBJECTIVES
UNIT 1: Surface Anatomy of the Head and Neck
Upon completion of this unit the student should be able to locate and identify the following on living subjects, models and/or pictures:

1. Supraorbital ridge (superciliary) 13. Bridge of the nose
3. Frontal eminence 15. Ala
5. External acoustic meatus 17. Apex of the nose
6. Tragus 18. Nasolabial sulcus
7. Orbit 19. Labiomental groove
8. Sclera 20. Vermillion zone
10. Pupil 22. Philtrum
11. Medial and lateral canthi 23. Tubercle of the upper lip
12. Root of the nose 24. Labial commissure
25. Mental protuberance

UNIT 2: Intra Oral Anatomy
Upon completion of this unit the student should be able to locate the following on a classmate or in pictures/drawings:

1. Labial frenum 21. Foramen cecum
2. Vestibules 22. Sulcus terminalis
3. Mucobuccal folds 23. Median lingual sulcus
4. Gingiva 24. Lingual tonsil
5. Attached gingiva 25. Deep lingual veins
6. Mucogingival junction 26. Lingual frenum
7. Marginal gingiva 27. Palatine tonsil
8. Gingival sulcus 28. Plica fimbriatae
9. Interdental gingiva or papilla 29. Sublingual caruncle
10. Hard palate 30. Fauces
11. Maxillary tuberosity 31. Anterior and posterior tonsillar pillars
12. Median raphe 32. Nasopharynx
13. Incisive papilla 33. Laryngopharynx
14. Rugae 34. Larynx
15. Soft palate 35. Esophagus
17. Pterygomandibular fold 37. Filiform papillae
18. Retromolar pad 38. Fungiform papillae
20. Tongue (apex, body, base)

UNIT 3: Glandular Tissue
Upon completion of this unit the student should be able to:
1. Describe the development of the salivary glands.
2. Identify the functions of salivary glands.
3. Identify two types of secretory cells and describe their secretory products.
4. State the amount of saliva produced daily.
5. Identify the two major groups of salivary glands.
6. Define exocrine, serous, mixed, and mucous.
7. Identify the major salivary glands; give the location and secretion of each; name their main ducts and give their percentage of total salivary volume.
8. Identify the minor salivary glands.
9. Describe the location of Von Ebner's glands and give its secretion.
10. State the part of the central nervous system which controls the salivary glands.
11. Describe how the salivary glands are examples of a merocrine gland with a compound tubuloalveolar structure.
12. Identify the nerves and blood vessels that supply each salivary gland.
13. Locate the thyroid gland, parathyroid glands and the thymus gland.
14. Identify the functions of the thyroid, parathyroid and thymus glands.
15. Identify the nerves and blood vessels that supply the thyroid, parathyroid and thymus glands

UNIT 4: Bones of the Head and Neck
Upon completion of this unit the student should be able to

I. Locate and identify the following:

CRANIAL BONES:
1. Occipital bone
   A. Foramen magnum
   B. Occipital condyles
   C. Jugular notch
   D. Hypoglossal canals
2. Frontal bone
   A. Supraorbital ridge
   B. Supraorbital notch
   C. Glabella
   D. Zygomatic process of the frontal bone
   E. Coronal suture
3. Parietal bones
   A. Sagittal suture
   B. Lambdoidal suture
   C. Squamosal suture
4. Temporal bones
   A. Squamous Portion
      a. Zygomatic process of the temporal bone
      b. Articular fossa (mandibular)
      c. Articular eminence
      d. Postglenoid process
      e. Temporal fossa
   B. Tympanic Portion
      a. External acoustic meatus
      b. Petrotympanic fissure
   C. Petrous Portion
      a. Mastoid process
      b. Mastoid notch
      c. Styloid process
      d. Stylomastoid foramen
      e. Jugular foramen
      f. Internal acoustic meatus
      g. Carotid canal
      h. Foramen lacerum
5. Sphenoid bone
   A. Body of the sphenoid
      a. Hypophyseal fossa
   B. Lessor wing of the sphenoid
      a. Optic canal (foramen)
      b. Superior orbital fissure
   C. Greater wing of the sphenoid
      a. Inferior orbital fissure
      b. Foramen rotundum
      c. Foramen ovale
d. Foramen spinosum  
e. Spine of the sphenoid bone  
f. Infratemporal crest  
D. Pterygoid process of the sphenoid  
a. Lateral pterygoid plate  
b. Medial pterygoid plate  
c. Pterygoid fossa  
d. Hamulus  
6. Ethmoid Bone  
A. Perpendicular plate  
B. Superior nasal conchae  
C. Middle nasal conchae  
D. Orbital plate  
E. Cribriform plate  
F. Crista galli  

**FACIAL BONES:**  
1. Vomer  
   A. Nasal septum  
2. Lacrimal bones (2)  
   A. Nasolacrimal duct  
3. Nasal bones (2)  
4. Inferior nasal conchae (2)  
5. Zygomatic bones  
   A. Frontal process  
   B. Temporal process  
   C. Maxillary process  
   a. Infraorbital rim  
   D. Zygomatic arch  
   a. Zygomatic process of the temporal bone  
   b. Temporal process of the zygomatic bone  
6. Palatine bones  
   A. Horizontal plate  
   a. Median palatine suture  
   b. Transverse palatine suture  
   c. Greater palatine foramen  
   d. Lesser palatine foramen  
   e. Posterior nasal apertures  
   B. Vertical plate  
   a. Orbital process  
7. Maxillary bones  
   A. Body of the maxillae  
   a. Maxillary tuberosity  
   b. Posterior superior alveolar foramina  
   c. Inferior and superior orbital fissure  
   d. Infraorbital foramen  
   e. Infraorbital sulcus  
   f. Infraorbital canal  
   g. Canine fossa  
   h. Nasal aperture (piriform aperture)  
   B. Frontal process of the maxilla  
   a. Medial orbital rim  
   C. Alveolar process  
   a. Canine eminence  
   D. Zygomatic process  
   a. Infraorbital rim
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

8. Mandible
   A. Body of the mandible
   B. Mental protuberance
   C. Symphysis
   D. Ramus
   E. Angle of the mandible
   F. Mental foramen
   G. External oblique line
   H. Coronoid notch
   I. Mandibular notch
   J. Coronoid process
   K. Condyle
   L. Articulating surface of the condyle
   M. Genial tubercles (mental spines)
   N. Mylohyoid line (ridge)
   O. Mylohyoid groove
   P. Sublingual fossa
   Q. Submandibular fossa
   R. Mandibular foramen
   S. Lingula
   T. Pterygoid fovea
   U. Retromolar triangle

II. Describe the hyoid bone and identify the body and greater and lesser cornu.
III. Discuss how the hyoid bone functions and what unique characteristic enables it to be mobile.
IV. Identify the paranasal sinuses and discuss their functions.
V. State the number of bones in the skull.
VI. Identify bones as either cranial or facial bones.
VII. Describe the function/purpose of foramina, canals, fissures and other bony openings.
VIII. Define articulation.
IX. List and define the words used to describe bony prominences.
X. List and define the words used to describe bony depressions.
XI. Identify the paranasal sinuses, their locations and functions.

Unit 5: Lymphatics Fascia and Spaces
Spread of Dental Infections
Upon completion of this unit the student should be able to:
1. State the function of the lymphatic system.
2. List the components of the lymphatic system.
3. Discuss the drainage pattern of the lymph system in the head and neck region.
4. Identify on a classmate and on a diagram the major groups of lymph nodes that drain the head and neck and specify the areas that they drain.
5. Define "primary", secondary", and "tertiary" nodes.
6. Locate the tonsillar tissues on a diagram.
7. Define lymphadenopathy.
8. Discuss the role of the lymphatic system in the metastasis of cancer.
9. Define superficial and deep fascia.
10. Identify the significance of fascia.
11. Identify the major spaces in the head and neck.
12. Discuss the significance of the spaces in the spread of dental infections.
13. Define terms used to describe dental infection and the spread of dental infection.
14. Discuss the different ways that dental infections can be spread.
15. Discuss the lesions and complications that can occur with the spread of dental infection in the head and neck region.
UNIT 6: Muscles
Upon completion of this unit the student should be able to:
1. Identify the muscles of facial expression and state the origin, insertion, and action of the muscle.
2. Identify the muscles of mastication, their origin, insertion, action, blood supply, and nerve supply.
3. Identify the cervical muscles, their origin and insertion, action, blood supply and nerve supply.
4. Identify the hyoid muscles, their origin and insertion, action, blood supply and nerve supply.
5. Identify the muscles of the tongue, their origin and insertion, action, blood supply and nerve supply.

UNIT 7: Nerves
Upon completion of this unit the student should be able to:
1. Identify the two major divisions of the nervous system.
2. Identify the three components of the peripheral nervous system.
3. Identify the twelve cranial nerves, their general functions and areas that they innervate.
4. For each of the following cranial nerves, describe the tissues innervated and whether the nerve is afferent (sensory) or efferent (motor):
   A. Trigeminal (all divisions and branches)
   B. Facial
   C. Glossopharyngeal
   D. Vagus
5. Discuss facial paralysis, Bell’s palsy and Trigeminal neuralgia.

UNIT 8: Blood Supply
Upon completion of this unit the student should be able to:
1. Identify and locate the arteries and veins of the head and neck and state the areas supplied or drained by each.
2. Trace the blood flow through the head and neck region.
3. Identify the significance of the routes of blood flow and the location of vessels as it relates to local anesthesia injections or the spread of dental infections.

UNIT 9: Permanent Anterior Teeth
Upon completion of this unit the student should be able to:
1. List or select from a list, the appropriate age(s) concerning the developmental chronology of incisors, found in the various developmental tables, when given a certain developmental feature.
2. Demonstrate a knowledge of the morphology of each surface or the crown and root of the incisors and canines by:
   a. describing
   b. selecting
   c. or using a drawing, photograph or specimen to identify or label any of the following features:
      1. contours of any surface or margin of a surface
      2. structural entities such as:
         b. cingulum
         c. developmental lines (depressions)
         d. fossae
         e. imbrication lines
         f. incisal edge
         g. linguogingival fissure
         h. linguogingival groove
         i. marginal ridges
         j. root grooves
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

3. Relative dimensions and shape
3. Describe or select the correct response from a list, the various comparisons between the incisors and canines.
4. Describe the general characteristics of any given incisor and canine including function, arch position, and distinguishing features.
5. Determine from a diagram, description, photograph or specimen whether a given incisor or canine is maxillary or mandibular, left or right, and central or lateral. F9
6. Determine the correct designation for a given incisor or canine diagram, description, photograph or specimen using any numbering system previously covered.
7. Recognize the developmental anomaly present when given a specimen or photograph of any incisor or canine.
8. Identify on a diagram or model, define or describe all the italicized terminology used in naming landmarks of the oral cavity.

UNIT 10: Permanent Posterior Teeth
Upon completion of this unit the student should be able to:
1. List or select from a list, the appropriate age(s) concerning the developmental chronology of premolars, found in the various developmental tables, when given a certain developmental features.
2. Demonstrate a knowledge of the morphology of each surface or the crown and root of the premolars and molars by:
   a. describing:
   b. selecting
   c. or using a drawing, photograph or specimen to identify or label any of the following features:
      1. contours of any surface or margin of a surface
      2. structural entities such as:
         a. cusps
         b. cusp ridges
         c. developmental grooves (lines/depressions)
         d. fossae
         e. longitudinal root grooves
         f. marginal ridges
         g. pits
         h. roots or central groove
   3. relative dimensions and shape
3. Describe or select the correct response from a list, the various comparisons between the premolars and molars.
4. Describe the general characteristics of any given premolar and molar including function, arch position, and distinguishing features.
5. Determine from a diagram, description, photograph or specimen whether a given premolar or molar is maxillary or mandibular, left or right, and first and second.
6. Determine the correct designation for a given premolar or molar diagram, description, photograph or specimen using any numbering system previously covered.
7. Recognize the developmental anomaly present when given a specimen or photograph of any premolar or molar.
8. Identify on a diagram or model, define or describe all the italicized terminology used in naming landmarks of the oral cavity.

UNIT 11: Deciduous Anterior and Posterior Teeth
Upon completion of this unit the student should be able to:
1. Demonstrate knowledge of the general differences between the permanent and deciduous teeth, by describing, or selecting the correct response from a list, when given one or more differences, or any appropriate implications of these differences.
2. Demonstrate knowledge of the morphology of each surface of the crown and root of all deciduous teeth by:
   a. describing
   b. selecting
c. or identifying from a diagram or specimen, any of the following features:
   1) contours of any surface, or margin of any surface
   2) structural entities such as grooves, pits, ridges cusps, fossae, etc.
   3) relative dimensions and shapes
   4) root numbers, location, and contours
   5) any other surface features

3. Describe or select the correct response from a list, the various comparisons between specific deciduous teeth, and their permanent counterparts, where appropriate.
4. Identify from a diagram, specimen or description which deciduous tooth is being described, or illustrated, as to classification, arch, or right or left quadrant.
5. Determine the correct number for a given diagram, description, or specimen using any numbering system previously covered.
6. List or select from a list the eruption dates of deciduous teeth.
7. Discuss the importance and functions of deciduous teeth.

UNIT 12: Development of the Face, Neck and Orofacial Structures
Upon completion of this unit the student should be able to:
1. Define key terms in chapters.
2. Integrate knowledge of the development of the face, neck and orofacial structures into understanding the observed structures and any developmental disturbances of these structures.
3. Discuss the development of the face including time of formation and the embryonic layers involved.
4. Explain the development of the following including formation sequence, time origin and tissues.
   a. stomodeum and oral cavity   c. maxillary process and midface
   b. mandibular arch and lower face d. front to nasal process and upper face
5. Explain the development of the neck including formation sequence, time, origin and tissue involved.
   a. primitive pharynx   b. bronchial apparatus
6. Describe the development of the palate including sources, fusion, role of tongue development, development of the nasal septum, and abnormalities associated with the fusion of the palate.
7. Describe possible areas of clefts with the fusing of the upper lip.
8. Describe the portions of the tongue and which bronchial arches are involved in its development.
9. State the time fusion of the palate should be complete.
10. Define tuberculum impar and copula.

UNIT 13: Tooth Development and Eruption
Upon completion of this unit the student should be able to:
1. Define key terms in this chapter.
2. Describe the stages of tooth development including the stay, time span, microscopic appearance, main processes involved, and its description.
3. Identify the cell layers of the tooth during the Bell Stage, a description of the layers and its role in tooth formation.
4. Describe the opposition and maturation stages of tooth development including formation of preameloblasts, odontoblasts and dental matrix, ameloblasts, dentinoenamel function and enamel matrix.
5. Explain the process of root development including root dentin, cementum, and pulp formation.
6. Describe the development of the periodontal ligament and alveolar bone development.
7. Explain the differences in root formation for multirooted teeth.
8. Explain the tooth eruption process and the shedding of the primary teeth.
9. Explain the process for permanent tooth eruption.

UNIT 14: Occlusion
Upon completion of this unit the student should be able to:
1. Correlate the relationship between the eruption schedule, growths, and ultimate alignment of the teeth.
2. Describe the affect which muscle forces have on the alignment of the teeth.
3. Define the terms:
   a. occlusion   d. centric occlusion
   b. static occlusion   e. centric relation
Orofacial Anatomy, Histology and Embryology (DHYG 1301)  
Summer II

c. functional occlusion  f. malocclusion
4. Discuss the rationale for observing a patient’s occlusion.
5. Describe and recognize the three types of facial profiles.
6. Describe and recognize the mal-relations of groups of teeth and individual teeth.
7. Describe angle’s classification of malocclusion for permanent and deciduous dentitions.
8. Describe and recognize normal (ideal occlusion (canine and molar relationships).
9. Discuss parafunctional habits, myofunctional and skeletal considerations, and occlusal trauma and their relation to occlusion.

UNIT 15: Orofacial Structures
Upon completion of this unit the student should be able to:
1. Describe the general histological features of oral mucosa.
2. Name the 3 categories of oral mucosa. Describe their characteristics.
3. Describe the 3 types of stratified squamous epithelium.
4. Name the main fiber of the lamina propria.
5. Describe the 2 layers of lamina propria.
6. Define submucosa.
7. Describe the regional differences of the oral mucosa by clinical features and histological features.
8. Describe the 4 types of lingual papillae in clinical appearance and histological features.
9. Name the four tastes and locate areas of the mouth where each taste sensation can be found.
10. Identify and state the functions of Langerhan’s cells, Merkel’s cells and melanocytes.
11. Discuss the renewal rates for different tissues in the oral cavity and their clinical correlations.

UNIT 16: Gingival and Dentogingival Functional Tissues
Upon completion of this unit the student should be able to:
1. Define key terms in chapters.
2. List and describe each of the types of gingival tissues.
3. Describe the histological features of the different types of gingival tissues.
4. Describe the composition and development of the dentogingival functional tissues.
5. Discuss cell renewal for the tissues of the dentogingival function.

UNIT 17: Enamel
Upon completion of this unit the student should be able to:
1. Define key terms in the chapter.
2. Describe the formation and location and physical characteristics of enamel, including the following:
   a. hardness       d. permeability
   b. thickness      e. solubility
   c. color          f. surface enamel
3. Describe:
   a. Ameloblasts    e. Interprismatic region
   b. Lines of Retzius f. Nasmyth’s membrane
   c. Tome’s processes g. Reduced enamel epithelium
   d. Enamel rods
4. List the chemical composition of enamel including percentages of each component.
5. Describe perikymata.
6. Describe the microscopic structure of enamel including the rods, rod sheaths, and interrod substance.
7. Describe and give the clinical significance of the following formations in the enamel.
   a. Neonatal line       d. enamel spindles
   b. Enamel lamellae      e. DEJ
   c. Enamel tufts         f. Imbrication lines
8. Discuss the apposition and maturation of enamel.

UNIT 18: Dentin and Pulp
Upon completion of this unit the student should be able to:
1. Define all terms in the chapter.
2. Discuss the dentin-pulp complex and describe the properties of dentin and pulp.
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

3. Discuss the apposition and maturation of dentin.
4. Outline the types of dentin.
5. Label the anatomical components of pulp.
6. Discuss the microscopic features of dentin and pulp.
7. Identify the microscopic zones in the pulp and describe the zone.
8. Describe the age changes in pulp and dentin.
9. List and describe the four main functions of the pulp.

Unit 19: Periodontium: Cementum, Alveolar Bone, Periodontal Ligament
Upon completion of this unit the student should be able to:
1. Define all terms in this chapter.
2. Discuss the periodontium and describe the properties of the cementum, alveolar bone, and periodontal ligament
3. Discuss the development of the periodontium.
4. Outline the types of cementum and alveolar bone.
5. Label the fiber groups of the periodontal ligament and discuss their functions.
6. Demonstrate and discuss the microscopic features of cementum, alveolar bone, and periodontal ligament.
7. Describe age changes in the periodontium.

UNIT 20: Temporomandibular Joint
At the end of this unit the student should be able to:
1. Locate and identify the specific, anatomical landmarks of the temporomandibular joint (TMJ) on a diagram, skull, and a patient.
2. Describe the histology of each component of the TMJ.
3. Describe the movements of the TMJ.
4. Integrate the knowledge of the anatomy and histology.
APPENDIX
Class Participation

* Participation grade – this grade is based upon the following factors:

1. **Attendance/Promptness:**
   In order to ensure that the student in the dental hygiene program acquires the necessary didactic and laboratory competencies outlined in the curriculum, it is necessary that the student complete all assigned lecture classes and laboratory hours as outlined in the SLIT Dental Hygiene Student Handbook. Students are expected to arrive and leave class according to the published schedule or as instructed by the faculty member.

2. **Level of Engagement in Class:**
   Participation in class includes being an active and willing participant in class by answering questions, participating in class discussions as appropriate, volunteering to read aloud, completing class practice activities during class or other assignments by the instructor.

3. **Listening Skills:**
   Student should listen when others talk, both in groups and in class.

4. **Behavior:**
   Student does not display disruptive behavior in class. Cell phones should be turned off and put away. **Texting is not permitted at any time while class or laboratory is taking place.**

5. **Preparation**
   a. **Course syllabus:**
      You must print out and the DHYG 1301 course syllabus. **The course syllabus must be brought to class and lab every day.**
   b. **PowerPoint notes/handouts**
      All chapter handouts must be printed out **prior to class arrival and brought to class every day.** These should be reviewed along with the reading assignment prior to the class period.
   c. **Textbooks:**
      A copy of the **current** textbooks must be purchased. The textbooks must be **brought to class and lab every day** unless otherwise instructed.
   d. **Class notes:**
      You should be able to show evidence that you actively complete class notes (or add additional notes that are meaningful and necessary to printouts) during the lecture as the instructor lectures.
   e. **Assignments:**
      Students should have read assigned chapter, viewed CD-ROMs, and completed quizzes and cases as specified below prior to class unless otherwise noted:

Grade = points/possible points
Other words of wisdom. Developing good habits in the classroom is extremely important!! Good classroom behavior and study habits will assist you in your endeavor to become a dental hygienist. Demonstrate leadership qualities by working with your Study Group* to share information, provide peer tutoring, support each other, and review daily class information.

*STUDY GROUPS

Sign-up sheet will be provided on the first day of class.
LABORATORY
Laboratory Assignment:  Bones

Dates:  Week 1

1.  Identify the landmarks of the skull using the Learner Objectives on pgs 16-18
   a. on the skulls provided in lab.
   b. on the diagrams on pgs 30-34.

2.  Identify the foramen, fissures, other holes, and what goes through them.
   a. on the skulls provided in lab.
FORAMEN, FISSURES, OTHER HOLES IN THE HEAD
AND
WHAT GOES THROUGH THEM

1. Superior Orbital Fissure
   Oculomotor nerve III
   Trochlear nerve IV
   Ophthalmic division of the trigeminal VI
   Abducens VI
   Superior ophthalmic vein
   Lacrimal, frontal and nasociliary nerves

11. Styloid Mastoid Foramen
    Facial nerve (from the internal acoustic meatus)

12. Inferior Orbital Fissure
    Infra-orbital arteries
    Maxillary division of the trigeminal V

13. Infra-orbital Canal
    Infra-orbital vessels and nerve
    Anterior superior alveolar artery

2. Foramen Rotundum
    Maxillary division of the Trigeminal V2

13. Infra-orbital Canal
    Infra-orbital vessels and nerve
    Anterior superior alveolar artery

3. Foramen Ovale
   Accessory meningeal artery
   Veins from the cavernous sinus to the pterygoid plexus of veins
   Mandibular division of the Trigeminal V3 (sensory and motor)

14. Infra-orbital foramen
    Infra-orbital nerve and vessels

4. Cribriform Plate
   Olfactory nerve I

15. Mental Foramen
    Mental artery and vein
    Mental nerve

5. Internal Acoustic Meatus
   Facial nerve VII (to the stylomastoid foramen)
   Vestibulocochlear nerve VIII

16. Mandibular Foramen
    Inferior alveolar artery and vein
    Inferior alveolar nerve

6. Jugular foramen
   Glossopharyngeal nerve IX
   Vagus nerve X
   Accessory nerve XI

17. Posterior Superior Alveolar Foramina
    Posterior superior vessels and Nerve

7. Hypoglossal Canal
   Hypoglossal nerve XII

18. Pterygomaxillary Fissure
    Maxillary artery
    Maxillary nerve

8. Incisive Foramen
   Greater palatine vessels

19. Optic Canal
    Optic nerve
    Nasopalatine nerve

9. Greater Palatine Foramen
   Greater palatine vessels
   Greater palatine nerve

20. Carotid Canal
    Internal Carotid Artery

10. Petrotympanic Fissure
    Branches of the maxillary artery
    Chorda Tympani

21. Foramen Spinosum
    Middle Meningeal artery
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II

Laboratory Assignment:  Muscles

Dates:  Week 2

1. Identify the muscles of the Head and Neck region using the Learner Objectives on pg 19.
   a. on the diagrams on pgs 42-48
   b. on the mannequins in lab

3. Complete the origin, insertion, action, blood supply, and nerve supply on the charts on pgs. 37-42

Laboratory Assignment: Permanent Anterior Teeth
Dates: Week 3

1. Identify the permanent anterior teeth using the Learner Objectives on pgs. 19-20.
2. Complete the tooth modules on anterior teeth
3. Complete the TOOTH PROJECT WORKSHEET pgs. 50-51
4. Complete the CD-ROM New Mentor Anatomy – Tooth Morphology anterior teeth

Laboratory Assignment: Permanent Posterior Teeth
Dates: Week 4

1. Identify the permanent posterior teeth using the Learner Objectives on pg. 20.
2. Complete the tooth modules on posterior teeth.

Laboratory Assignment: Primary Dentition
Dates: Week 5

1. Identify the deciduous teeth using the Learner Objectives on pg. 20-21.
2. Complete the tooth modules on deciduous teeth.

Laboratory Assignment: Occlusion
Dates: Week 5

1. Identify the occlusion on sample models using the Learner Objectives on pg. 21-22
2. Complete the occlusion modules.
TOOTH PROJECT WORKSHEET

On your typodont identify the following morphological characteristics using various colored markers (permanent Sharpie markers work best). Indicate the color used for each item in the space provided on the worksheet. The same color may be used to identify more than one non-related characteristic. (Ex: Red may be used to identify one of the grooves, one of the ridges, etc.)

A. On the maxillary and mandibular right, identify:

<table>
<thead>
<tr>
<th>Name of MORPHOLOGICAL CHARACTERISTIC</th>
<th>COLOR USED</th>
</tr>
</thead>
<tbody>
<tr>
<td>CENTRAL FOSSA</td>
<td></td>
</tr>
<tr>
<td>MESIAL TRIANGULAR FOSSA</td>
<td></td>
</tr>
<tr>
<td>DISTAL TRIANGULAR FOSSA</td>
<td></td>
</tr>
<tr>
<td>MESIOLINGULAR FOSSA</td>
<td></td>
</tr>
<tr>
<td>DISTOLINGULAR FOSSA</td>
<td></td>
</tr>
<tr>
<td>LINGUAL FOSSA</td>
<td></td>
</tr>
<tr>
<td>INCISAL EDGE</td>
<td></td>
</tr>
<tr>
<td>CINGULUM</td>
<td></td>
</tr>
<tr>
<td>ROOT DEPRESSION (S)</td>
<td></td>
</tr>
<tr>
<td>FURCATIONS</td>
<td></td>
</tr>
<tr>
<td>OBLIQUE RIDGE</td>
<td></td>
</tr>
<tr>
<td>TRANSVERSE RIDGE</td>
<td></td>
</tr>
</tbody>
</table>
B. On the maxillary and mandibular left identify:

<table>
<thead>
<tr>
<th>Name of MORPHOLOGICAL CHARACTERISTIC</th>
<th>COLOR USED</th>
</tr>
</thead>
<tbody>
<tr>
<td>TIP OF EACH CUSP</td>
<td></td>
</tr>
<tr>
<td>MESIAL CUSP RIDGE</td>
<td></td>
</tr>
<tr>
<td>DISTAL CUSP RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH MESIAL MARGINAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH DISTAL MARGINAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH TRIANGULAR RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH CERVICAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH BUCCAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH LINGUAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>EACH LABIAL RIDGE</td>
<td></td>
</tr>
<tr>
<td>CENTRAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>BUCCAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>MESIAL MARGINAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>MESIOLINGUAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>DISTOLINGUAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>LINGUAL GROOVE</td>
<td></td>
</tr>
<tr>
<td>DISTOBUCCAL GROOVE</td>
<td></td>
</tr>
</tbody>
</table>
Orofacial Anatomy, Histology and Embryology (DHYG 1301)
Summer II
DHYG 1301 GRADE COMPUTATION SHEET

Student Name______________________________

Exams  _____, _____, _____, _____, _____, _____ = Avg._____ x .85 = _____

Participation  _____ x .15 =_____  

Completion
   Tooth and Occlusion Modules         _____
   Head and Neck Anatomy CD-ROM Quizzes  _____
   Landmark Identification Quizzes       _____

FINAL GRADE

       _____
