Programmable Controllers (RBTC 1401)

Credit: 4 semester credit hours (3 hours lecture, 4 hours lab)

Prerequisite/Co-requisite: CETT-1405

Course Description
A study in programmable controllers (PLC). Topics include processor units, numbering systems, memory organization, relay type devices, timers, counters, datamanipulators, and programming.

Required Textbook and Materials
   a. ISBN number is 978-0-07-351088-0
   a. ISBN number is 978-0-07-330342-1
3. Scientific Calculator

Course Objectives
Upon completion of this course, the student will be able to:

1. Demonstrate a knowledge of programming basics for PLCs.
2. Demonstrate integration of PLCs into systems.
3. Diagnose faults in PLC programming.
4. Write working programs using ladder logic.

Course Outline
A. Programmable Logic Controllers (PLCs): An Overview
   1. Programmable Logic Controllers
   2. Parts of a PLC
   3. Principles of Operation
   4. Modifying the Operation
   5. PLC’s versus Computers
   6. PLC Size and Application
   7. Memory Design and Types
   8. Programming Devices
   9. Recording and Retrieving Data
   10. PLC Workstations

B. PLC Hardware Components
   1. The I/O Section
   2. Discrete I/O Modules
   3. Analog I/O Modules
   4. Special I/O Modules
   5. I/O Specifications
   6. The CPU

C. Number Systems and Codes
   1. Decimal System
   2. Binary System
   3. Negative Numbers
   4. Octal System
   5. Hexadecimal System
   6. BCD System
   7. Gray Code and ASCII Code
   8. Parity Bit
   9. Binary Arithmetic

D. Fundamentals of Logic
   1. The Binary Concept
   2. AND, OR, and NOT Functions
RBTC 1401
Course Syllabus

3. Boolean Algebra
4. Developing Circuits
5. Producing the Boolean Equation
6. Hardwired Logic/Programmed Logic
7. Word Level Instructions
E. Basics of PLC Programming
   1. Processor Memory Organization
   2. Program Scan
   3. PLC Programming Languages
   4. Relay Type Instructions
   5. Instruction Addressing
   6. Branch Instructions
   7. Internal Relay Instructions
   8. Entering the Ladder Diagram
   9. Modes of Operation
F. Developing Wiring Diagrams and Ladder Logic
   1. Control Relays
   2. Contactors and Motor Starters
   3. Manually and Mechanically Operated Switches
   4. Transducers and Sensors
   5. Output Control Devices
   6. Seal-In Circuits
   7. Latching Relays
G. Programming Timers
   1. Mechanical Timing Relay
   2. Timer Instructions
   3. On-Delay Timer Instruction
   4. Off-Delay Timer Instruction
   5. Retentive Timer
   6. Cascading Timers
H. Programming Counters
   1. Counter Instruction
   2. Up-Counter
   3. Down-Counter
   4. Cascading Counters
   5. Incremental Encoder-Counter Applications

Grade Scale

<table>

<tr>
<td>70 – 79</td>
<td>C</td>
</tr>
<tr>
<td>60 – 69</td>
<td>D</td>
</tr>
<tr>
<td>0 – 59</td>
<td>F</td>
</tr>
</tbody>
</table>

Course Requirements
1. Identify the main parts of a PLC and describe their function.
2. Describe the basic circuitry and applications for I/O modules and interpret I/O and CPU specifications.
3. Define the decimal, binary, octal, and hexadecimal, numbering systems and explain BCD, Gray, and ASCII Codes and be able to convert from one numbering or coding system to another.
4. Convert relay ladder schematics to ladder logic programs and program instructions that perform logical operations.
5. Write and enter ladder logic programs and use internal relay instructions.
6. Explain the operation of sensors and output control devices commonly found in PLC installations.
7. Analyze and interpret typical PLC timer ladder logic programs.
8. Analyze and interpret typical PLC counter ladder logic programs.
9. Apply combinations of counter and timers to control systems.

Disabilities Statement
The Americans with Disabilities Act of 1992 and Section 504 of the Rehabilitation Act of 1973 are federal anti-discrimination statutes that provide comprehensive civil rights for persons with disabilities. Among other things, these statutes require that all students with documented disabilities be guaranteed a learning environment that provides for reasonable accommodations for their disabilities. If you believe you have a disability requiring an accommodation, please contact the Special Populations Coordinator at (409) 880-1737 or visit the online resource:
http://www.lit.edu/depts/stuserv/special/defaults.aspx

Student Code of Conduct Statement
It is the responsibility of all registered Lamar Institute of Technology students to access, read, understand and abide by all published policies, regulations, and procedures listed in the LIT Catalog and Student Handbook. The LIT Catalog and Student Handbook may be accessed at www.lit.edu or obtained in print upon request at the Student Services Office.
