

**Licensure and Certification Disclosure Table
Lamar Institute of Technology (LIT)**

In accordance with 34 CFR 668.14(b)(32) and 34 CFR 668.43, the College provides the following Licensure and Certification Disclosure Table to ensure transparency regarding the educational requirements for professional licensure or certification in each U.S. state and territory. Federal regulations require institutions to determine and disclose whether their academic programs meet, do not meet, or if the institution has not yet determined whether a program meets the educational requirements for professional licensure or certification in the state where a student is located or in any state where a student indicates they intend to seek employment.

This disclosure supports students in making informed decisions regarding enrollment and program completion, particularly for programs that may lead to occupations requiring state licensure, certification, or programmatic accreditation. While the College strives to maintain accurate and current information, licensure and certification requirements vary by state and are subject to change. Students are strongly encouraged to consult the appropriate state licensing agency to verify requirements and understand additional non-educational criteria such as background checks, examinations, clinical hour thresholds, or other state-specific conditions.

The College remains committed to regulatory compliance and to supporting all students—face-to-face, hybrid, and distance learners—in understanding their pathway to licensure across state jurisdictions.
